WORK EXPERIENCE

Manager Production Engineering – Market Risk and Reporting TD Securities

07/2022 - Present,

- Vigilant Performance Oversight:** Maintaining constant vigilance over the performance and availability of technology solutions, ensuring optimal functionality across the board, establishing a robust foundation for managing Counterparty, Credit, and Market Risk.
- Stakeholder Support and Liaison:** Offering steadfast support to stakeholders across different business areas including including Front Office, Middle office and Back office, serving as the primary contact for inquiries and concerns related to the utilization and effectiveness of Risk Management technology solutions, promoting effective communication and collaboration.
- Swift Resolution of Technical Challenges:** Addressing technical glitches and challenges promptly is imperative to minimize disruptions to operations, ensuring the smooth functioning of systems integral to Counterparty, Credit, and Market Risk management, thereby maintaining operational continuity.
- Continuous Improvement Initiatives:** Identifying opportunities to enhance and improve system efficiency and effectiveness in Risk Management processes within TD Securities, promoting innovation and agility in response to changing market dynamics.
- Adherence to Regulatory Standard:** Maintaining stringent compliance standards, ensuring that all technology solutions align with regulatory requirements and internal policies governing Counterparty, Credit, and Market Risk, mitigating potential compliance risks and ensuring organizational integrity.
- Strategic Collaboration for Advancement:** Collaborating strategically with cross-functional teams, contributing to the development and execution of plans to continuously improve technology solutions that support Risk Management objectives, and fostering a culture of innovation and excellence.
- Integrated Collaboration with Business Units:** Leading the implementation and management of robust technological solutions targeted to the Credit and Market Risk domains within TD Securities, enabling thorough integration across all business units.
- Comprehensive Implementation and Analysis:** Performing a broad range of activities encompassing implementation, research and analysis, administration, and performance/availability management for both new and existing technology solutions and surrounding frameworks.
- Administration of Crucial Systems:** Overseeing a wide array of systems and applications, including both new implementations and existing frameworks, ensures the seamless operation and functionality of crucial components vital to Risk Management operations, fostering resilience and reliability.
- Visionary Leadership for Technological Advancement:** Boasting a steadfast commitment to excellence and pioneering strategies and endeavors that propel the technological landscape of Counterparty, Credit, and Market Risk management at TD Securities forward, thereby securing the firm's position as a leader in industry innovation.
